This documentation is a *work in progress* guide for people that wish to collaborate in the development of the inPact community tool.

CHAPTER 1

Getting started

The *main.py* and *models_v1.py* are the top files organising the app's functionality.

In the main file, the jinja environment is set as:

```
template_dir = os.path.join(os.path.dirname(__file__), 'www')
jinja_env = jinja2.Environment(loader=jinja2.FileSystemLoader(template_dir),
                               extensions=['jinja2.ext.autoescape'],
                               autoescape=True) # autoescape is important for
↪ security!!
```
